

On today's **anti-Poroshenko march in Kiev Saakashvili promote one of his better speeches I ever heard.**

He's excellent tribune. I can't explain you his goals better and situation in Ukraine more vivid as he did it today. Watch and listen it on video here: <https://www.youtube.com/watch?v=Uy5gXS8gqhl>

Sending some photos from the event including with attempt of storm of October palace -- cultural center above Maidan with strategic position. In news they will give different interpretations of this event, but in fact people of Saakashvili hired in this palace few rooms to organize there headquarter of his movement.

But today police not permitted entrance there with motivation that there is concert of classic music and manifestants **are** may be danger for audience. To "defend" audience inside they fulfilled all palaces with tear gas and use it against manifestant outside. What a soviet ignorance.

2. Reports:

About **black-red flags**, that dominates now. It's a flag of Ukrainian resistance against external and internal enemies. Under this red (Mother soil and death) and red (blood) Organization of Ukrainian nationalist and its armed forces Ukrainian insurrection army (OUN-UPA) fight against German fascist and Soviet communist during WW2 and after it. Stalin's security organs liquidated armed resistance of OUN-UPA only in 1954. Hundred of thousand of members of OUN-UPA and its supporters (or innocent people) was executed or sent to concentrations camps in Siberia.

In the USSR about 70% of political prisoners were Ukrainians.

Today's **Ukraine**. Rulers **don't** support such flags, but **it is not forbidden** - as in Poland.
